EDUCATION

UBDT College of Engineering, Davanagere
B.E. in Computer Science, 2019 – May 2023
GPA: 7.5

PROFESSIONAL SUMMARY

I am a motivated and detail-oriented fresher Spring Boot developer, equipped with a solid foundation in Java programming and a strong interest in developing robust and scalable web applications. My academic background in Computer Science, along with hands-on experience in Spring Boot, positions me to contribute effectively to a dynamic development team.

SKILLS

- ◆ Core Java
- ◆ Collections
- ◆ Spring Boot
- ◆ RESTful APIs
- ◆ JPA and Hibernate
- ◆ Thymeleaf
- ◆ SQL
- ◆ Git
- ◆ HTML5 and CSS3
- ◆ React JS

SKILLS SUMMARY

- ◆ Core Java: Proficient in Core Java, with a good grasp of basic syntax and essential libraries.
- ◆ OOP: Strong understanding of object-oriented programming principles.
- ◆ Spring Framework: Skilled in using the Spring Framework to build robust, scalable, and maintainable enterprise applications with Spring Boot, Spring MVC, and Spring Data.
- ◆ Microservices: Experienced in designing and developing loosely coupled, independently deployable services, utilizing RESTful APIs and containerization for scalable applications.
- ◆ RESTful APIs: Capable of designing RESTful APIs with a solid understanding of HTTP methods and status codes.
- ◆ SQL: Proficient in SQL, focused on querying, manipulating, and managing data effectively.

COURSE AND CERTIFICATE

Java Enterprise Application Development

X-Workz, Bangalore | June 2023 – February 2024

PROJECTS

Smart Contact Manager

(github.com/Santosha2001/scm)

Developed a cloud-based contact manager for organizing user contacts and their information.

- **RESTful APIs:** Developed APIs for managing user data, including adding, updating, and deleting records.
- **Database Operations:** Utilized Spring Data JPA for efficient database interactions.
- **Security:** Implemented Spring Security to secure the application, authenticate users, and protect controllers from unauthorized access.
- **Front-End Views:** Employed Thymeleaf for dynamic and user-friendly front-end views.
- **Mail Management System:** Integrated a mail management system to improve user experience and authentication.

Tools Used: Java, Spring Boot, MySQL, JPA, Hibernate, Thymeleaf, JavaScript
